

Cannibisters Discount Performance Report

90-Day Analysis (7 Nov 2025 – 5 Feb 2026)

This report analyses discount code performance over a 90-day period, highlighting top revenue drivers, discount efficiency, and the performance of time-based promotions such as Night Owl.

Core Discount Performance

Friends & Family, Cash Deal + Friends & Family, and Wheel of Fortune form the backbone of discounted revenue. These promotions consistently drive high order volume and strong net sales.

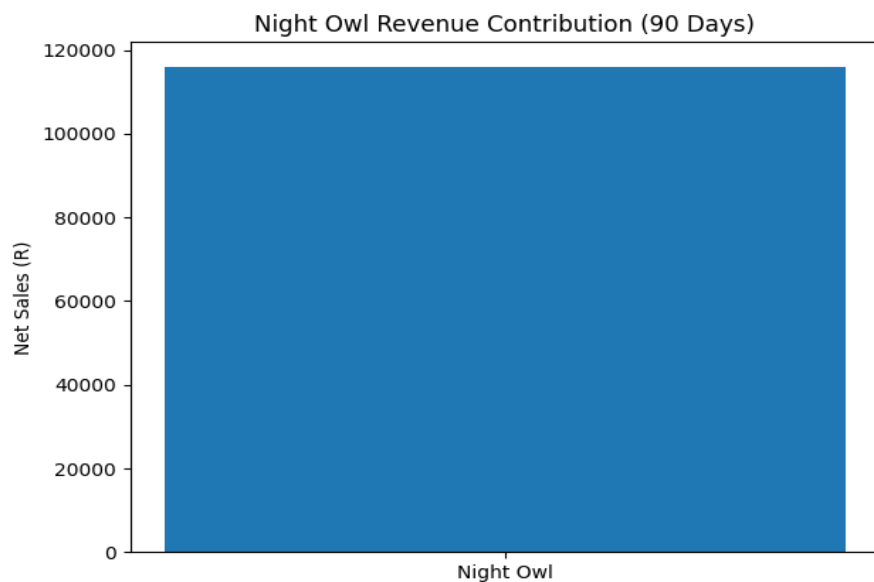

Night Owl (Happy Hour 22:00) Performance

Night Owl discounts are deployed as dynamic Happy Hour codes generated nightly at 22:00. By consolidating all Happy Hour-labelled discounts, we can now accurately measure Night Owl performance.

90-Day Results:

- Orders generated: 152
- Revenue generated: R116,109
- Discount given: R24,439

Night Owl is a strong supporting promotion that successfully monetises late-night demand. While not a primary revenue driver, it generates incremental sales during off-peak hours at a controlled discount cost.

Strategic Recommendations

- Continue prioritising Friends & Family and Wheel of Fortune as core revenue drivers.
- Retain Night Owl as a targeted late-night incentive rather than a mass-discount campaign.
- Apply consistent naming conventions to all dynamic discounts to maintain long-term reporting clarity.
