Google Ads Performance

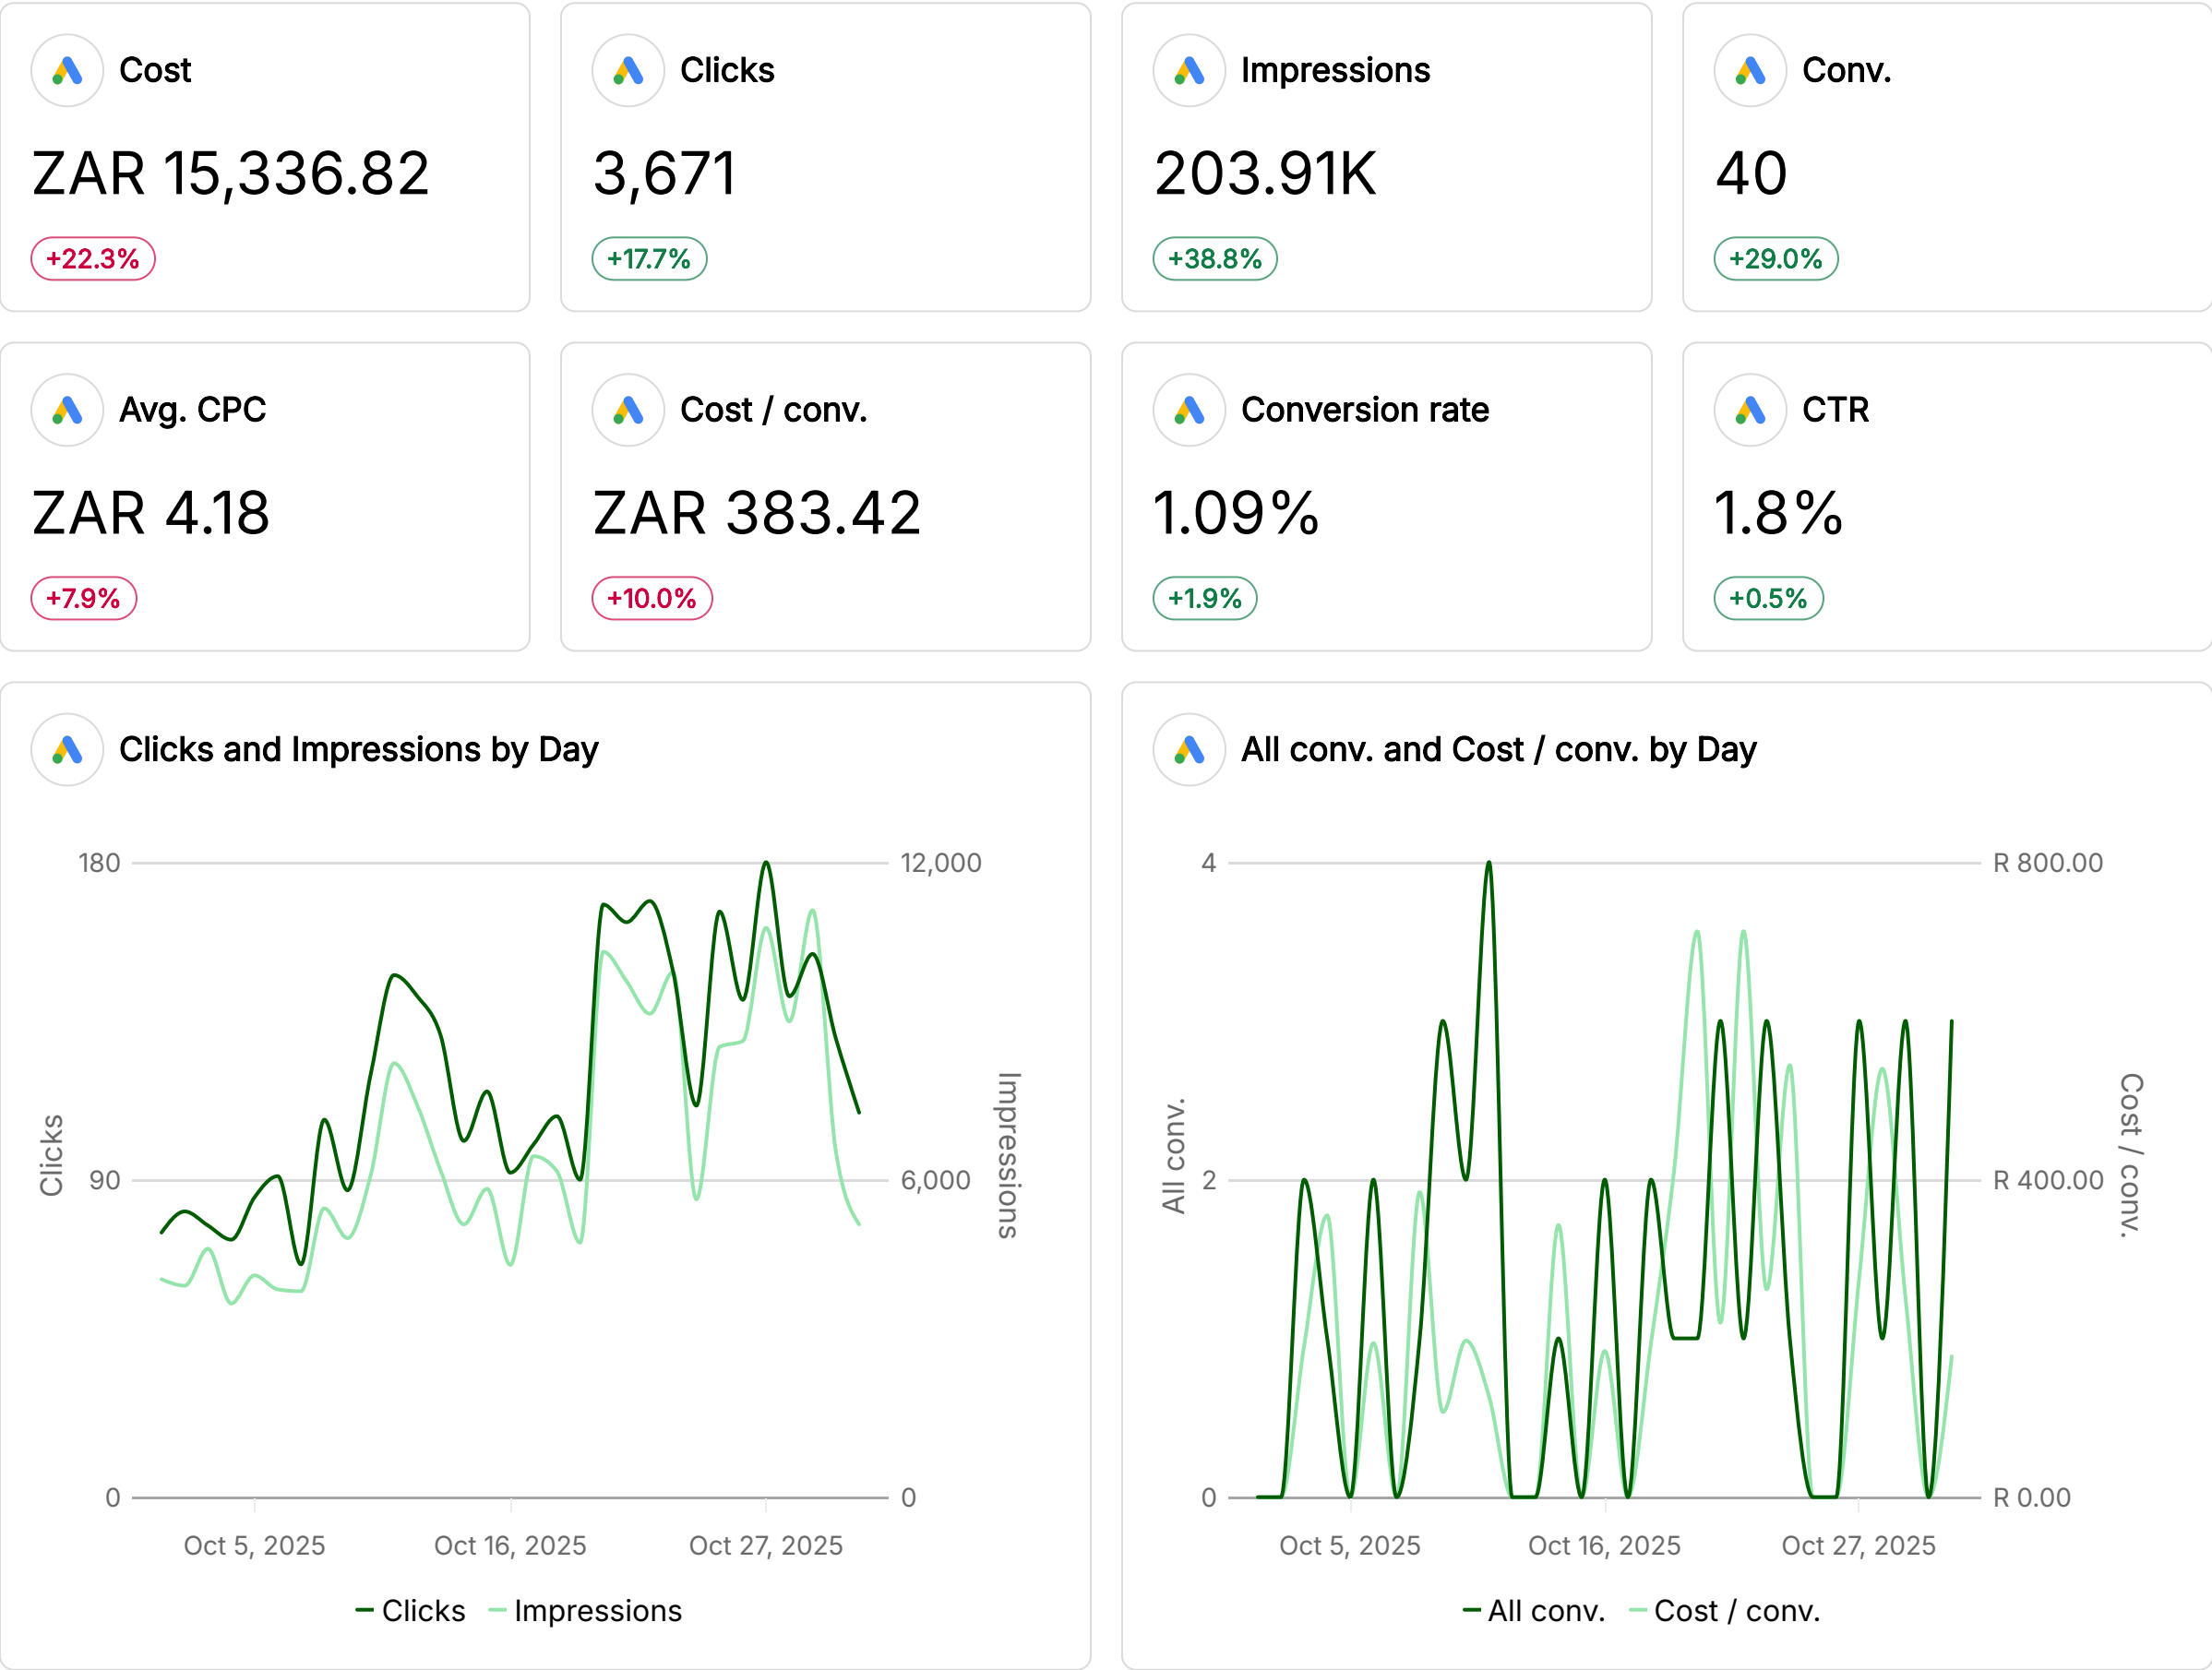

Google Ads Performance

Key Insight: Google Ads remained steady in most areas, with improved performance in **Conversions, Impressions & Clicks**. Due to the **slight increase in budget** this month, it was expected that **cost related metrics** would see some increases, such as **Cost-per-Click & Cost/Conv**. I will keep an eye out on Novembers Ad performance and optimise the campaigns where necessary, but the current **5-10% fluctuations** aren't anything to worry about.
